

PRODUCT OVERVIEW

**TROUGH  
ROCKS®**

# WHAT ARE TROUGH ROCKS?

- Trough Rocks are Australian paramagnetic rocks when placed into your animals' trough they inhibit the growth of algae and bacteria.
- They keep trough water cleaner for longer.
- All-natural minerals, no chemicals, straight from the earth.
- Perfectly safe for long term use for both humans and animals (including pregnant and competing animals).

ROCKS®**

# HOW DO TROUGH ROCKS WORK?

- Due to the high paramagnetic value, a simple ion exchange occurs when Trough Rocks are placed in water.
- Free molecules bond to the rock removing them from the water source.
- This paramagnetism inhibits the growth and distribution of algae and bacteria throughout the water.

# HOW TO USE TROUGH ROCKS

## Before use

Clean your trough thoroughly, emptying out existing water and scrubbing the trough to remove algae. Remember Trough Rocks won't kill existing bacteria, Trough Rocks keep clean water clean.

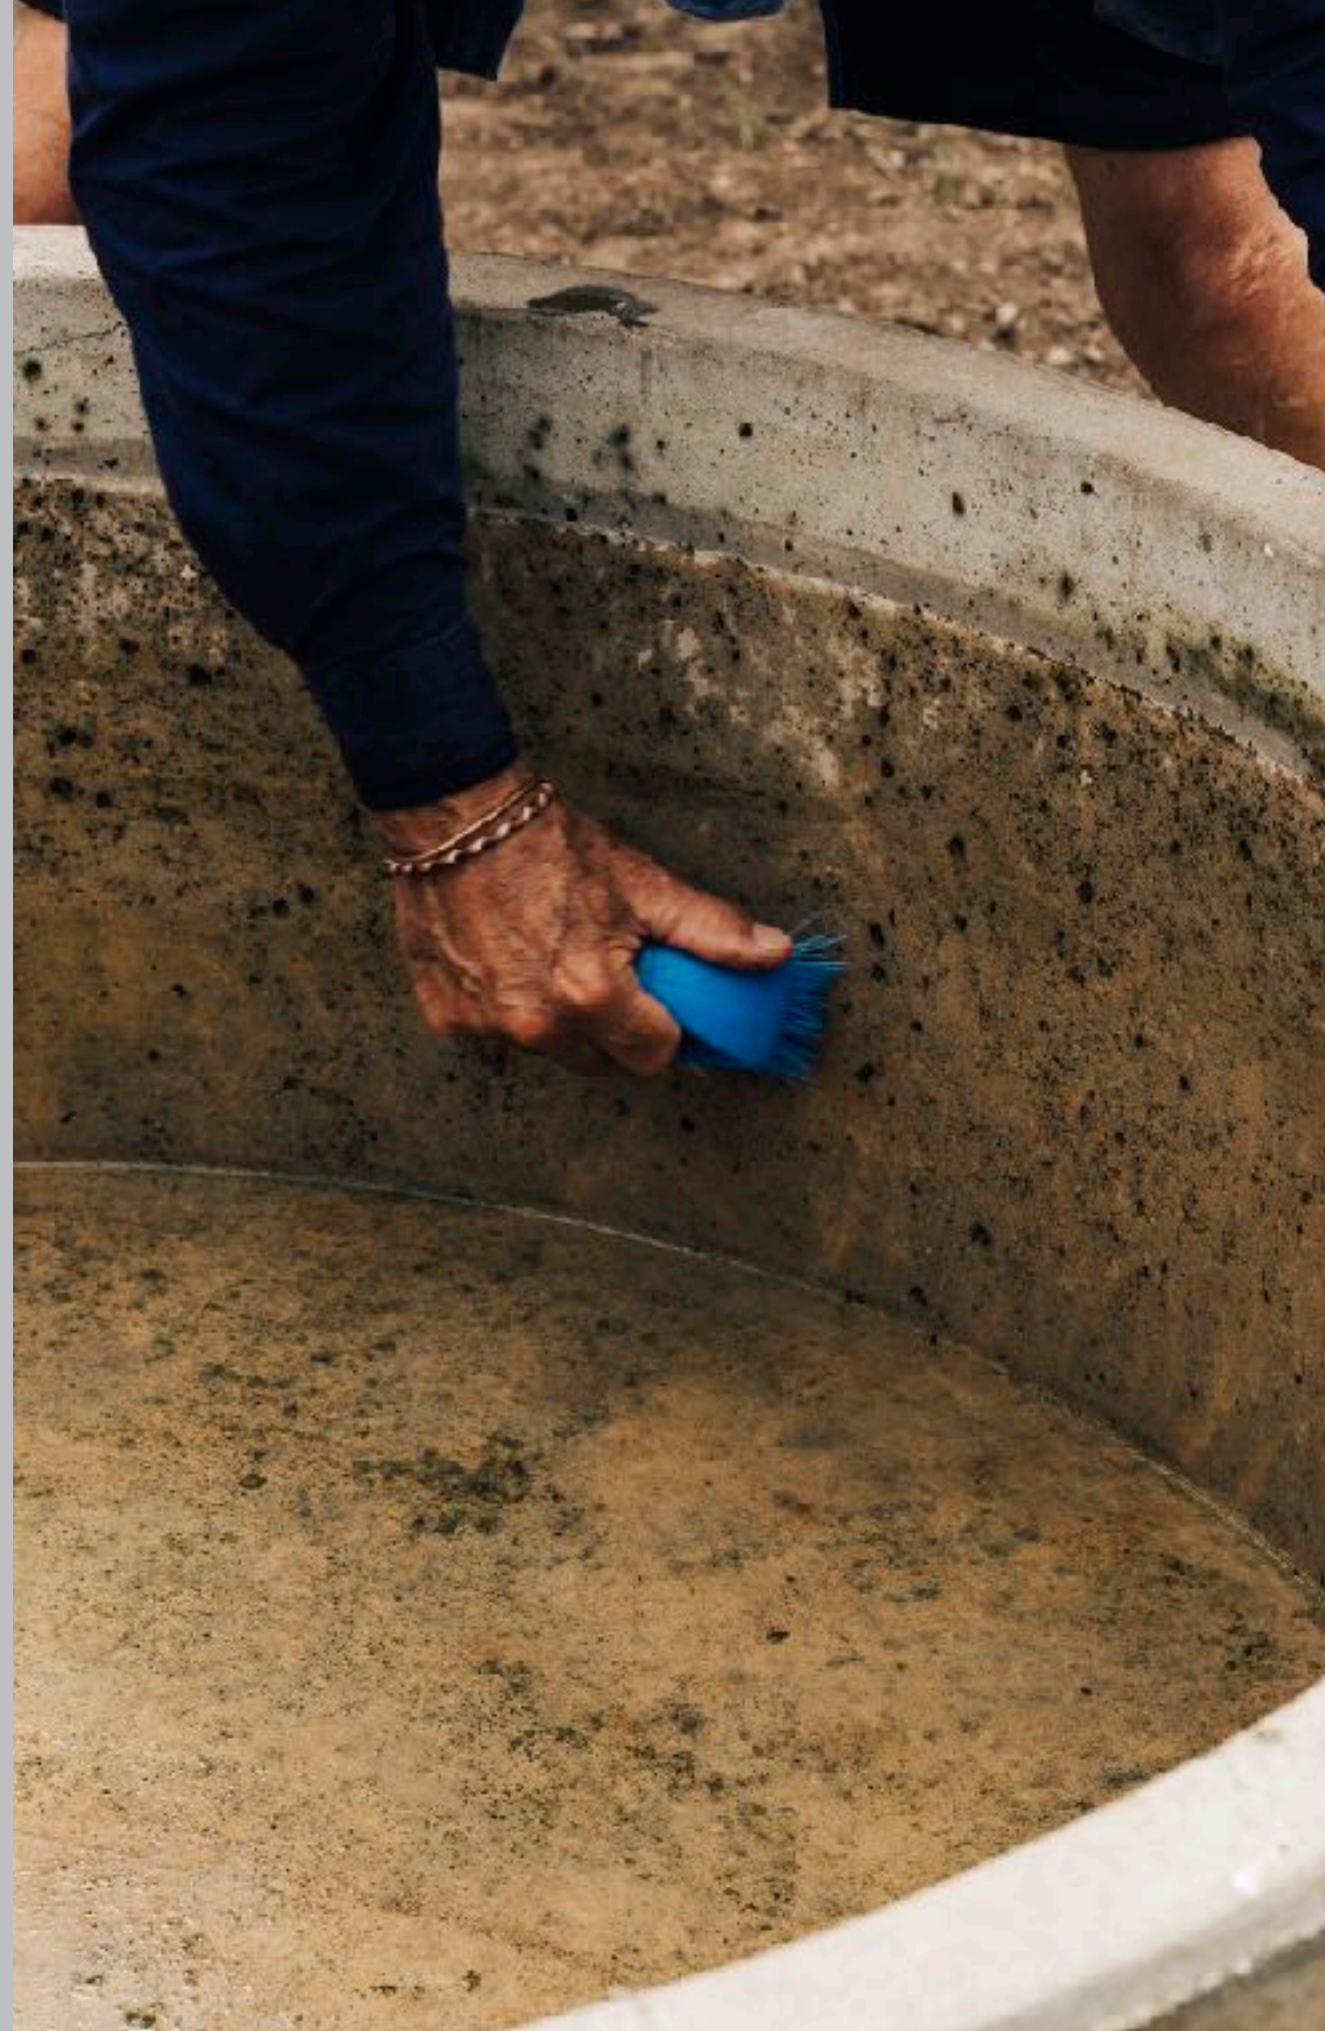

## When the trough is clean

Remove the tag. Place the whole Trough Rocks bag at the bottom of the trough. Refill trough with fresh water.

## Trough Rocks won't last forever

For best results, repeat the process every four months with a new Trough Rocks bag.
